

## **AFANDI Whitepaper**

### **About Nasriddin Afandi**

Nasriddin Afandi (also known as Nasreddin Hodja) is a legendary folk character widely known across Central Asia, the Middle East, and many parts of the world.

He is remembered as a witty, humorous, and wise storyteller who uses intelligence and satire to teach life lessons. Through short anecdotes and jokes, Afandi represents justice, clever thinking, and the voice of ordinary people.

The \$AFANDI project draws inspiration from these qualities. Just like Afandi's stories, the project aims to combine humor, culture, and wisdom while creating a strong and united community.

Our brand embraces fun and memes, but is built with serious long-term intentions and responsible development.

### **Mission**

Our mission is to build a community-driven meme ecosystem that blends entertainment with real utility.

\$AFANDI seeks to create a safe, transparent, and sustainable crypto project where holders feel confident, engaged, and rewarded.

We aim to:

- Provide fair and secure tokenomics
- Maintain strong liquidity and trust
- Promote creativity through memes and community participation
- Develop utilities such as staking, NFTs, and gaming
- Grow into a long-term digital brand rather than a short-term speculative token

### **Ownership & Team Structure**

The project founder and current owner of \$AFANDI is Abrorjon.

At the initial stage, the project is independently managed to ensure focused development and clear decision-making.

As the ecosystem expands, additional developers, designers, marketers, and community managers will be carefully selected and hired.

Future team members will be chosen based on professionalism, transparency, and long-term commitment to sustainable project growth.

This structure ensures both strong leadership and gradual decentralization over time.

## Tokenomics

Token Name: Afandi

Ticker: \$AFANDI

Blockchain: Solana

Total Supply: 1,000,000,000 AFANDI

Minting: Disabled

Inflation: None (Fixed Supply)

Token Type: SPL

Liquidity Pool – 45% (450,000,000 AFANDI)

Ensures smooth trading and price stability. LP tokens will be locked long-term.

Community Rewards – 5% (50,000,000 AFANDI)

Used for airdrops, contests, and supporter incentives.

Marketing & Partnerships – 20% (200,000,000 AFANDI)

Supports promotion, influencers, partnerships, and exchange listings.
